- Built a full-stack e-commerce platform with product listing, product details, shopping cart functionality.
- Architected state management by separating server state (React Query) and client state (Zustand), improving scalability and maintainability.
- Integrated Axios and React Query for API communication, caching, background re-fetching, and optimized data synchronization.
- Developed secure authentication and authorization using JWT, protected routes, and role-based access control.
- Designed responsive and reusable UI components with React.js and CSS, ensuring cross-device compatibility.
- Added dark/light theme support with persistent user preferences.
- Implemented a Web App Manifest (manifest.json) to enable PWA capabilities, allowing users to install the app with custom icons, theme colors, and a native app-like experience.
- Optimized frontend performance using useMemo, component reusability, lazy loading, and efficient rendering strategies.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB for scalable backend operations.

Portfolio Website

Tech Stack: React.js, Tailwind CSS, JavaScript, Framer Motion
